The celebration of the Millennium of the first reference to Lithuania in written historical sources is reasonable to relate with more modest jubilees of its towns and townships and give an implication to these anniversaries of their first written reference by a written word—a book.

In pre-war Lithuania there were more than 400 rural districts (*valsčiai*), which were later replaced by neighbourhoods (*seniūnijos*) numbering now about 300. With a hope that our capacities will enable us to publish books about the majority of them, we kindly invite culture institutions, district governments, neighbourhoods, local activists, local lore investigators, state men, culture activists, sponsors and all writers to join, without hesitation, the team preparing and publishing the hundred volumes of the “Lietuvos Valsčiai” series about Lithuanian history and traditional culture. A great work to last several decades is waiting for you.
